

Weyauwega-Fremont School District Referendum Question and Answer of the Day

Q. Why would the District consider building improvements with slight declining student enrollment?

A. Reasoning Consensus

The District will continue to educate all students in our District with the greatest integrity regardless to current and future enrollment numbers. As a District we are obligated to foster school safety, create climate controlled environments and develop modern learning spaces for todays and tomorrows' student while advancing best practice curriculum delivery approaches.

A. Reasoning High School

Heating and cooling system update to current HVAC system which is nearing 30 years old, incorporate conditioned air and improvements to air quality throughout the building so that climate control can be regulated with efficiencies.

Create/remodel current classroom and activity areas to improve spaces with increased hands on learning arrangements to support science, technology, engineering, agri-science, math (STEAM) fine arts and physical activity curriculum.

Current high school entrance lacks a necessary secure vestibule accommodation to direct students and guests to the high school office ensuring appropriate traffic flow when entering and exiting the building.

A. Reasoning Fremont Elementary

Relocation of current school office to an exterior entrance. Current Fremont Elementary primary entrance lacks a necessary secure vestibule accommodation to direct students and guests to the school office ensuring appropriate traffic flow when entering and exiting the building at the main entrance.
