

Q. Why is there a recommendation for a multi-purpose activity space/gym addition to the high school?

A. Reasoning Instructional Space Integrity

Current utilization of District gym spaces create inefficiencies for activity classes and co-curricular programming. Addition of a multi-purpose activity/gym space/weight room would allow greater flexibility to coordinate necessary spaces for elementary, middle school and high school physical education instruction.

A. Reasoning Co-Curricular District and Community

Currently the District utilizes the old high school main street gymnasium for co-curricular practices. Addition of a multi-purpose activity/gym space would allow greater flexibility to coordinate necessary co-curricular practices and community programming events allowing for increased efficiencies in practice time, travel and instructional spaces.

A. Reasoning Old High School Main Street Building Condition

Current conditions of the existing old high school main street gymnasium is faced with continued maintenance and site improvement to ensure the integrity of the facility. Continued investment into an aged facility that has morphed in purpose and was last used for instructional delivery 25 years ago does not foster long term forward thinking.
