

Q. Why a new auditorium?

A. Reasoning Space, storage, equipment, production efficiency, respect for venue and climate control

Current configurations of our high school auditorium do not allow for necessary amenities to showcase exemplary fine arts programming. Portable lighting, sound, technical support, seating and non-conditioned air quality creates production obstacles to overcome during performances. Our current auditorium was transformed in 2004 into a multipurpose room/space that does not meet traditional auditorium services which should be present for the performing arts.
